PROFESSIONAL SUMMARY

IT Support Engineer and Systems Administrator with hands on experience across network infrastructure, cybersecurity operations, identity and device management, and physical security. Spent over a year as the sole IT professional for a Melbourne crypto brokerage, building the office network from scratch, remediating a third party security audit, and leading the Melbourne side of a cross company integration after the Swyftx acquisition. Experienced in both Google Workspace and Microsoft 365 environments, including Entra ID, Intune and JumpCloud, with automation skills in Power Automate, Python and Bash.

SKILLS

Network Infrastructure: UniFi enterprise (Dream Machine Pro, USW Pro 48 PoE, U7 Pro access points), VLAN segmentation, firewall configuration, site to site, L2TP and WireGuard VPN, DHCP and DNS, IP routing and subnetting, guest WiFi portal, cabling and patching

Security Operations: CrowdStrike Falcon EDR, Abnormal Security, Cloudflare Zero Trust and WARP, Microsoft Sentinel, incident response, vulnerability assessment and remediation, audit remediation, application allowlisting, phishing simulation and security awareness

Identity and Devices: Microsoft 365, Entra ID, Intune, Active Directory, Google Workspace, JumpCloud MDM and DDM, Apple Business Manager, SSO and MFA, user lifecycle management, device enrolment, Windows Server, macOS and Windows, Azure Key Vault (basics)

Physical Security and AV: UniFi Access, UniFi Protect, NFC and Apple/Google Wallet credentials, fire panel integration, Zoom Rooms, Zoom Phone, Zoom Contact Center

Automation and Development: Power Automate, Python, Bash, PowerShell (basic), Gemini API, SharePoint, SQL, JavaScript, Java, C++, PHP, HTML5, CSS, React, Vue.js, Node.js, D3.js, Git and GitHub

Data, Cloud and Tools: MySQL, MongoDB, Tableau, Amplitude, AWS, Google Cloud Platform, Jira, Confluence, Slack, Asana, iMazing Profile Editor, ITIL, change management, technical documentation

Business Analysis: BPMN, RPA, BPMS, Bizagi Modeler, use case and UML modelling, user acceptance testing, SWOT, PEST, Porter's Five Forces, Power BI

Languages: English, Mandarin, Cantonese and Malay (fluent), Hokkien (conversational)

WORK EXPERIENCE

Caleb and Brown (part of Swyftx) ***Melbourne***
IT Support Engineer *Apr 2026 to Present*
IT Specialist *Apr 2025 to Mar 2026*

- Sole IT professional for the Melbourne office, reporting to the CTO and, after the Swyftx acquisition, to the IT Manager in Brisbane as part of a four person IT team. Title changed to IT Support Engineer in April 2026 following the acquisition.
- Led the Melbourne side of integrating Caleb and Brown onto the Swyftx tech stack in about three months: built a SaaS inventory of 40+ applications with every team lead, tested each app on Swyftx laptops, and moved 50+ staff across Australia, the US and the UK onto a single managed laptop.

- Resolved Cloudflare WARP profile conflicts and IP allowlisting access issues between the two companies, with profile switching deployed through Microsoft Intune to Windows and macOS.
- Designed and deployed the full office network for a 746 sqm space as a fresh graduate: floor planning, equipment selection, UniFi gateway, switching and WiFi, six VLAN segments, firewall policy, DHCP, L2TP and site to site VPN, with zero downtime during the office move and zero unplanned outages since.
- Remediated all five findings from a third party cybersecurity audit, including fleet wide port scanning, tamper proof port blocking, firewall stealth mode and formal change documentation.
- Identified and patched a critical no auth network vulnerability (CVSS 10.0) before exploitation, and led a phishing investigation using browser history, MDM logs and malware scans that confirmed zero data compromise.
- Rolled out and manage UniFi Access and Protect across 5 doors and 4 cameras, including Apple and Google Wallet passes, remote unlocks, guest access and fire panel compliance; set up Zoom Rooms and AV with contractors.
- Administer Google Workspace, Microsoft 365, Entra ID, Intune, JumpCloud, Apple Business Manager, CrowdStrike Falcon, Abnormal Security and Cloudflare Zero Trust across the full user and device lifecycle, with support tracked in Jira.
- Built a daily AI powered threat intelligence feed in Power Automate using Gemini, filtering four security sources against the company tech stack and posting relevant alerts to Slack, plus a flow that routes business failures to on call teams.

Monash University ***Clayton***
IT Support Officer (Casual) *Oct 2024 to Mar 2025*

- Provided Level 1 and 2 support for hardware, software and network issues through the university ticketing system, managing user accounts, access and software installations.

Earlier Experience ***Melbourne***
Mobile App Tester (Freelance), Userbrain *Jun 2023 to Sep 2023*
Hospitality and Retail (Sunglass Hut, Coach, Chatime, Delaware North and more) *2023 to 2025*

- Tested apps and documented clear, reproducible bug reports, and delivered customer service in fast paced environments while studying full time.

EDUCATION

Bachelor of Information and Communication Technology ***2023 to 2024***
Swinburne University of Technology *Hawthorn*

- **Minors:** Management Information Systems and Advertising Technologies
- **High Distinctions:** Network Administration, Cyber Security for Business, Advanced Web Development, ICT Project A
